## Factual Findings

I/m states that Medical isn't providing the proper medical care.

Mr. Moore was seen in medical 11/7/13 and was upset with an incident that occurred 9/16/13 on his block in his cell when the toilet exploded with feces and urine. He said they had to stay in the cell overnight with the same clothing. The next morning he came to medical and the nurse only checked his pulse and sent him back. Upon reviewing his medical chart he was assessed by the RNs 9/16/13 and 9/18/13, in which all vital signs were taken not just a pulse ox. He was educated on the sick call process and verbalized understanding. He will also be followed up in chronic care clinic for possible cardiac disease he stated he has. Paperwork was completed by him to release medical information from his custody provide to the prison provider. Appointment was scheduled 11/14/13, however he was released 11/14/13.

## Recommended Action of the Deputy Warden
